Search for "Lee Calladine" to find my videos.

If you are about to build a pond then before doing any construction take a look at the following videos. These videos are not simple time-lapses set to a bit of music. They are detailed informative videos that I created to help people learn the basics of Koi pond construction.

"Lee Calladine Block Work Koi Pond" This is an extremely useful video that will explain how to construct a Koi pond similar to the ones here at JWG. It is packed full of information about bottom drains, pipework, filters.

"Lee Calladine Drum Filter Install Step By Step Guide." Do not be put off by the title of this video. I can not recommend any video more highly for someone building a Koi pond. It is actually a series of videos detailing the entire process of building a Koi pond, with clear step by step instructions.

"Lee Calladine Sleeper Pond Step by Step Guide." Another essential watch for the pond builder. This time were talking pump fed filter and a liner install. I promise you this is well worth you're time and you will learn so much about pond construction!

When you watch these videos they will answer 99% of the questions you have about building ponds.

And you will have a few more questions that you never would have even thought of!

Please like the videos, post a comment and subscribe to the channel.
